LOCATION: India

Integration specialist with 5+ years of experience in trading systems, platform migrations, and infrastructure rollouts in global financial markets. Skilled in Linux, FIX protocol, automation scripting, and cross-team technology delivery for high-performance trading platforms.

PROFILE SUMMARY

- Integration Specialist with 5+ years of experience delivering complex trading system integrations, large-scale infrastructure rollouts, and platform migrations across global financial markets and trading environments.
- Extensive experience supporting FX, equities, and derivatives trading platforms for institutional clients, trading desks, and quantitative research teams globally.
- Proven ability to coordinate cross-functional teams including engineering, infrastructure, quantitative researchers, and business stakeholders to deliver complex enterprise technology initiatives.
- Strong expertise in Linux environments, Bash/Python scripting, and SQL for automation development, troubleshooting, system diagnostics, and technical analysis.
- Hands-on experience implementing FIX protocol connectivity, trading workflow integrations, and algorithmic trading infrastructure support across institutional trading platforms.
- Skilled in observability and monitoring tools including Grafana, Kibana, Tableau, and TSS to analyze system performance, operational metrics, and production stability.
- Experienced in large-scale legacy system migrations, user onboarding, and enterprise application rollout coordination across multiple teams, regions, and global environments.
- Track record of improving platform performance, reducing integration timelines, and maintaining high system availability in mission-critical production trading environments.
- Strong background in incident management, root cause analysis, and production support for mission-critical financial systems and trading infrastructure.
- Proficient with Agile workflows, change management processes, and Atlassian collaboration tools including JIRA, Confluence, and Service Desk platforms.

CORE COMPETENCIES

- Trading Systems Integration
- Infrastructure Rollouts
- System Migrations
- FIX Protocol Connectivity
- Stakeholder Management
- Risk Management & Incident Resolution
- Cross-Team Coordination
- Observability & Monitoring Tools
- Automation & Scripting
- Change & Release Management
- Technical Project Delivery
- SDLC & Infrastructure Lifecycle
- Impact & Migration Planning
- Business Requirement Analysis & Translation
- Performance Optimization

SOFT SKILLS

- Problem-solver
- Analytical Thinking
- Team Leadership
- Cross-Functional Collaboration
- Communicator

EDUCATION

- **2019:** B.Tech. from Government College Of Engineering
- **2021:** PG-DAC from Sunbeam Institute Of Information Tech

TECHNICAL SKILLS

- **Programming & Scripting:** Bash Scripting, Python, JavaScript, SQL
- **Systems, Databases & Financial Technology:** Linux, FIX Protocol, KDB+, PostgreSQL, MySQL, Trading Systems Integration, Algorithmic Trading Platforms
- **Observability & Monitoring Tools:** Grafana, Kibana, Tableau, ELK Stack, TSS Monitoring Tools
- **Tools & Methodologies:** Jira, Confluence, Git, Bitbucket, Salesforce Service Cloud, Agile (Scrum, Kanban), SDLC, Change Management, CAB Governance

CERTIFICATIONS

- PMP Certification by Technical Institute Of America (35 PDUs)
- Comprehensive Guide to Financial Market, Investing, Trading

CAREER TIMELINE

2021-2022: Associate Technical Analyst | Flextrade Systems

2022 - 2024: Technical Analyst | SGX FX

Sept'24 - Present: Integration Specialist | Squarepoint Capital

WORK EXPERIENCE

Sept'24 - Present: Integration Specialist | Squarepoint Capital

Integration Specialist | 2025 – Present

- Led firm-wide application and infrastructure rollouts across trading and research platforms, coordinating engineering, infrastructure, and quantitative research teams.
- Managed migration of users and workflows from legacy trading systems to modern platforms, improving scalability and operational efficiency.
- Designed and implemented automation scripts using Bash/Python to assess project impact and track migration metrics, reducing manual reporting effort by ~25%.
- Coordinated cross-functional teams including developers, infrastructure engineers, and quantitative researchers to deliver integrated trading workflow solutions.
- Utilized observability tools such as Grafana, Kibana, and Tableau to monitor platform performance, migration progress, and operational health.
- Maintained project tracking and governance documentation in JIRA and Confluence, improving transparency across large-scale rollout initiatives.
- Supported high-impact infrastructure upgrades and system decommissioning activities across front-to-back trading workflows.
- Conducted SQL-based validation and analysis of migration datasets to ensure accurate reporting and system readiness.
- Developed training materials for team members on agile practices and project management tools, which improved team efficiency and understanding of project goals.

Trade Flow Support Analyst | 2024 – 2025

- Managed global trading platform support across equities and derivatives infrastructure, ensuring stability and reliability of production systems.
- Orchestrated onboarding and migration of trading flows, collaborating with 10+ engineering and infrastructure teams, reducing integration timelines by 15%.
- Conducted 20+ monthly pipe-cleaning validation activities for new asset classes to ensure system readiness before production trading.
- Investigated and resolved 100+ trade flow and connectivity issues, achieving a 95% first-response resolution rate.
- Served as a member of the Change Advisory Board (CAB) reviewing 50+ production changes per month, helping maintain 99.9% platform uptime.
- Developed 10+ automation tools and scripts to improve operational workflows and reduce manual effort by ~25%.
- Used Grafana, Kibana, and TSS monitoring tools to analyze system performance and troubleshoot infrastructure issues.
- Collaborated with developers, infrastructure teams, and trading operations to diagnose platform incidents and improve system performance.

2022 - 2024: Technical Analyst | SGX FX

- Managed FX trading platform integrations and technical support for major institutional clients, including Commonwealth Bank of Australia, Nomura, and ICICI Bank, ensuring reliable system performance and client satisfaction.
- Delivered 20+ clients trading system deployments, configuring Linux-based backend infrastructure and supporting Java/C++ trading applications for institutional trading environments.
- Improved platform performance by 10% through targeted system optimization and coordinated project execution across development and infrastructure teams.
- Conducted regression latency analysis to identify performance bottlenecks, reducing latency by 10% and improving system efficiency by 20% in production trading environments.
- Collaborated with global development, QA, and product teams to support feature rollouts, issue resolution, and platform enhancements, improving client satisfaction by 15%.
- Integrated algorithmic trading workflows and platform components using JavaScript, Linux, and Bash scripting, enabling more efficient trading operations.
- Provided real-time technical support during FX trading hours, troubleshooting trading connectivity and platform issues to ensure uninterrupted trading activity.
- Assisted in client onboarding and FIX connectivity configuration, supporting seamless integration of institutional trading systems with the platform.

2021 - 2022: Associate Technical Analyst | Flextrade Systems

- Managed key FX client accounts, including OCBC Bank, Millennium Management, Crescent Asset Management, Modular Asset Management, as Technical Account Manager.
- Enhanced trade flow by integrating with internal and external API systems, increasing overall trade flow by 15%.
- Onboarded clients and brokers via FIX interface, boosting operational efficiency by 12%.
- Utilized Linux skills and proficiency in ticket tracking systems like Salesforce.
- Optimized FIX connectivity and resolved issues through collaboration with investment banks and liquidity providers, reducing downtime by 16%.
- Certified and supported FIX connections in Production and UAT, managing onboarding, FIX engine support, and STP setup.
